

# SHARK FACTS

**GREAT WHITE SHARKS:** These are the most famous sharks, often seen in movies. They can grow up to 20 feet long and have rows of sharp teeth!

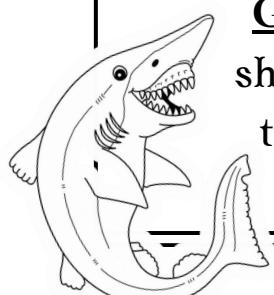

**HAMMERHEAD SHARKS:** This shark's head looks like a hammer! Its wide head helps it see better and find food.

**WHALE SHARKS:** Don't be fooled by the name! Whale sharks are the largest sharks, growing over 40 feet long. But they eat tiny things like plankton!

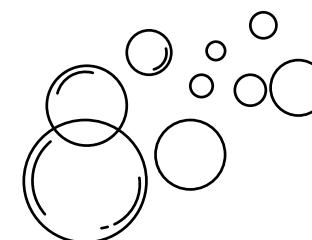

**GOBLIN SHARKS:** This deep-sea shark has a long, flat snout and sharp teeth. It looks a little spooky and is rarely seen by people.

# SHARK FACT MATCH-UP

**WRITE THE LETTER NEXT TO THE NUMBER TO MATCH EACH SHARK TO ITS CORRECT FACT.**

- A. Great White Shark
- B. Hammerhead Shark
- C. Whale Shark
